Professional Summary

Computer Science graduate with hands-on experience in React.js, JavaScript, and responsive UI development through two front-end internships. Experienced in integrating APIs, managing application state, and building production-ready interfaces. Built full-stack projects independently using Node.js and MongoDB, with working knowledge of backend architecture. Seeking a Frontend Developer role to build performant, scalable web applications.

Education

Bhartiya Institute of Engineering and Technology, Sikar <i>Bachelors of Technology in the branch of Computer Science</i>	2020 - 2024
Indian Public Sr. Sec. School Fatehpur Sekhawati <i>12th standard</i>	2018 - 2020 69.00%
Shri S.K Deora School, Fatehpur Sekhawati <i>10th Standard</i>	2014 - 2018 57.83%

Technical Skills

markup/styling languages : HTML, CSS,
languages : JavaScript
Frameworks and Libraries : React.js, Bootstrap, Node.js, Express.js
Database Management: MongoDB
Tools: Git, GitHub, VS Code, Figma

Experience

WeSalvator <i>Front-end developer intern</i>	Oct 2025 – Jan 2026 <i>Remote</i>
--	---

- Built and enhanced React UI components using Material UI and integrated them with backend APIs.
- Collaborated with the team using Git, fixing UI bugs and handling real-world edge cases.
- Implemented async data fetching and centralized state management and improving data consistency.

Techqunba Solutions <i>Front-end developer intern</i>	Aug 2025 – Sep 2025 <i>Jaipur, Rajasthan</i>
---	--

- Gained hands-on experience in building responsive and interactive user interfaces using HTML, CSS, JavaScript, and React.js.
- Worked on live projects, applying industry best practices such as version control with Git/GitHub and code structuring for scalability.
- Integrated REST APIs into front-end applications for dynamic data rendering and state management.

Integrated Institute of Hardware and Technology <i>MERN Stack Training</i>	Aug 2024 – Dec 2024 <i>Jaipur, Rajasthan</i>
--	--

- Successfully completed intensive training in the MERN Stack (MongoDB, Express.js, React.js, Node.js), acquiring hands-on experience in building and deploying full-stack web applications.
- Developed dynamic and responsive front-end interfaces using React.js, implementing state management with Context API to enhance application performance and scalability.
- Designed and optimized database schemas with MongoDB, ensuring efficient data storage and retrieval for application functionality.

Projects

FoodFleet <i>Live Demo</i>	Link
-------------------------------------	----------------------

- Architected FoodFleet as a modular React.js SPA with reusable components (Navbar, Cart, Checkout), reducing component duplication and enabling faster feature iteration.
- Developed key components such as Navbar, Menu Page, Cart, and Checkout to enhance user interface functionality.
- Managed cart state and async menu data fetching using useState and useEffect hooks, enabling real-time cart updates without full page reloads.

Preferred Resorts <i>Live Demo</i>	Link
---	----------------------

- Built a real-time room booking system with live availability updates using React.js and Node.js, supporting end-to-end reservation flow from search to confirmation.
- Designed and optimized a mobile-responsive website, ensuring a seamless user experience across all devices.
- Utilized MongoDB for effective management and storage of hotel room details, bookings, and user information, ensuring data consistency and accessibility.
